SUMMARY

Back-end engineer with experience in designing scalable, secure, and high-performance systems across microservices, fintech platforms, and modern cloud-native environments. Skilled in database design, distributed systems, monitoring, DevOps automation, and infrastructure management. Passionate about building reliable systems and expanding my future career toward AI-powered backend solutions, intelligent automation, and high-scale architectures.

EXPERIENCE

Backend Engineer

August 2025 - Present

Khanetala

Tehran, Tehran, Iran | On-site | Full-time

Tech: Node.js, NestJS, Redis, MongoDB, Nexus, GitLab, Prometheus, Grafana, Docker, Linux.

- Led infrastructure and server-side operations, ensuring maximum uptime, security and reliability.
- Developed scalable microservices using NestJS & Node.js with fully Dockerized workflows.
- Managed GitLab Shell Runners and CI/CD pipelines for automated deployments.
- Deployed & tuned Prometheus/Grafana with custom dashboards and alerting.
- Enhanced system reliability using systemd service management.

Backend Developer

May 2024 - May 2025

Galaxy Vision

Tehran, Tehran, Iran | On-site | Full-time

Tech: Node.js, NestJS, Express, MongoDB, MinIO, Redis, NGINX

- Developed and optimized the wallet system with a focus on reliable and secure transactions.
- Maintained & scaled backend services connected to multi-database MongoDB clusters.
- Refactored legacy codebase into modular NestJS, improving performance & maintainability.
- Integrated Redis caching layer, improving response time across services.

Backend Developer

October 2020 - April 2024

Jadeh

Tehran, Tehran, Iran | On-site | Full-time

Tech: Node.js, Express.js, NestJS, PostgreSQL, MongoDB, Redis, Message Brokers.

- Contributed to the wallet subsystem, ensuring secure and reliable transaction processing.
- Maintained the main backend application ensuring stability, scalability, and resilience.
- Developed high-performance APIs using message brokers and distributed caching.

EDUCATION

Bachelor's Degree In Web Programming

January 2023 - Present

Iran University of Applied Informatics

Tehran, Tehran, Iran

Associate's Degree In Computer Programming

October 2019 - May 2022

Iran University of Applied Informatics

Tehran, Tehran, Iran

SKILLS

Language: Go, JavaScript, TypeScript, SQL

Backend: Gin, Fiber, Node.js, Express.js, NestJS, Socket.io, Message Brokers

Databases: MongoDB, PostgreSQL, SQL Server

DevOps / Infra: Docker, Linux, NGINX, Caddy, Git, Redis, Object Storage (MinIO, SeaweedFS), Monitoring Tools

Other: CI/CD pipelines, system design, Angular, IoT, microservices
